- Node
- Express
- SQL
- MongoDB
- RESTful API
- EJS Templating
- HTML
- CSS
- Bootstrap
- TailwindCSS
- Git
- Github

CAREER OBJECTIVES

Seeking a position as a Full Stack Junior Software Engineer. I am a strong problem solver who is eager to start, always willing to learn, encourages constructive criticism, and emphasizes excellent communication in a work and personal environment. Previously I was a Physical Therapist Assistant with a history of working with patients to help them with resolving pain and returning to their prior level of function.

PROJECTS

- Menu-App
 - First front-end project working in a team of three to create an app that when you don't know what to eat, it'll generate a random dish and drinks. Worked through app planning, dividing tasks, team dynamic. My task was to create API call and to display response to HTML. Technologies used are figma, html, js, css.
- Betting Website (Work in progress)
 - Node.js, Express, Postgres
- Travel planner (Work in progress)
 - React, Redux
- PT2GO
 - Partnered with a colleague to create an app that allows rehab professionals to make home exercise program for patients. I was in charge of creating backend framework, api calls, persisting redux state, setting up data structure/flow, along with JS logics.

EXPERIENCE

Physical Therapist Assistant

Memorial Hermann SM&R, Town&Country, Houston, TX / Oct 2021 - Sep 2022

- Outpatient clinic focusing on aquatics, postops rehab, sports injury rehab, joint-mobilization, manual skills, clinical decision making, and evidence-based practices. Experienced with taking on guiding students through post-ops OP critical thinking.
